Invasive American Bullfrog

Lithobates catesbeianus 5 to 20 cm

mapping the spread of invasive frogs

INVADER ALERT

introduced frogs displace native frogs and spread amphibian diseases

Native Columbia Spotted Frog Rana luteiventris

4 to 10 cm

Native Pacific Treefrog (Pacific Chorus Frog) Pseudacris regilla 2 to 5 cm

Native Western Toad Anaxyrus boreas 6 to 12 cm

Protect our native frogs. Report introduced frog sightings.

Phone: 250-354-6333 Email: kootenaybullfrog@gov.bc.ca Or download the <u>Report Invasives BC</u> mobile app for iPhone or Android If possible, obtain photos to assist with identification when reporting sightings

IDENTIFICATION KEY

FROGS AND TOADS OF INTERIOR BC

The Best Place on Earth FUNDING PROVIDED BY THE MINISTRY OF ENVIRONMENT AND THE HABITAT STEWARDSHIP PROGRAM

> Adapted from MOE347597.0307 • MARCH 2007

Does the frog have parotoid glands behind the eyes and tough warts on the skin?

Does the frog have a prominent black facial mask and adhesive toepads on all toes?

Does the frog have irregular black spots on the head, back, and legs, and two parallel folds of skin running from head to tail?

Columbia Spotted Frog YES YES Rana luteiventris NO

Does the frog have a skin fold following the shape of the large, prominent ear membrane?

American Bullfrog YES YES Lithobates catesbeianus

More Bullfrog identification tips:

- Bullfrogs are large, robust frogs with brownish to olive green colouring.
- Ear membranes are larger than diameter of the eye.
- There are no dorsal folds (skin folds running down the back)
- Bullfrog males have bright yellow throats during the breeding season.
- Male mating call is a distinctive loud rasping honk. Listen at: www.ckiss.ca/species/american-bullfrog/
