

Central Kootenay Invasive Plant Priority List 2020

Category	Definition
1a. Provincial Prevent	These species which are considered high risk to B.C. and are either not yet present or new to the province. These species are considered "Prevent" by the Provincial government as designated in the "Priority Invasive Species in B.C." list found here https://www2.gov.bc.ca/gov/content/environment/plants-animals-ecosystems/invasive-species . These species are managed by MFLNRORD.
1b. Provincial EDRR	These species which are considered high risk to B.C. and are either not yet present or new to the province. These species are considered "Provincial EDRR" by the Provincial government as designated in the "Priority Invasive Species in B.C." list found here https://www2.gov.bc.ca/gov/content/environment/plants-animals-ecosystems/invasive-species . These species are managed by MFLNRORD.
2. Regional EDRR	These species may not occur in the IPMA or have less than 10 known sites across the IPMA in IAPP. If a species has less than 10 sites across entire CKISS region, it will be designated Regional EDRR for the CKISS Region. The goal for these species is immediate eradication if they are detected. EDRR reporting and action protocols for these species are outlined in Section 3.4. These sites are extremely high priority for treatment.
3. Eradicate/Annual Control	These species are known in the IPMA but with very limited distribution. Some of these species may have been present for a relatively long period so monitoring for spread is the management objective. Other species are relatively new to the IPMA so eradication is the objective.
4. Contain	These species are abundant (with no expectation of eradication) in certain portions of IPMA but have limited distribution in other portions. Management efforts are delineated by containment areas which may be based on geographic (i.e. a specific region) or jurisdictional boundaries (e.g. private property only). Some of these species have biocontrol (BC) agents available which may be useful within the containment area.
5a. Established: no Biocontrol or Site Specific Approach	These are widespread species that are beyond landscape-level control and/or have relatively low impact. Land managers may choose to treat these species at high priority sites (e.g. wildlife habitat, corridors of spread, adjacent to agricultural land, restoration sites, etc.) based on specific land management objectives. These species have no biocontrol agents available.
5b. Established: Biocontrol or Site Specific Approach	These are widespread species that are beyond landscape-level control and/or have relatively low impact. Land managers may choose to treat these species at high priority sites (e.g. wildlife habitat, corridors of spread, adjacent to agricultural land, restoration sites, etc.) based on specific land management objectives. These species have biological control agents available.
6. Insufficient Information	These species are considered invasive in BC but insufficient information is available regarding their distribution, impacts, potential for spread and/or feasibility of control within the CKISS region. Education, targeted inventories, and possibly risk assessments are recommended.

Central Kootenay Invasive Plant Priority List 2020

Scientific Name	Common Name	CKISS Region	Creston IPMA	Kaslo IPMA	Lower Arrow IPMA	Nakusp IPMA	Nelson IPMA	Slocan IPMA
<i>Peganum harmala</i>	African rue	1a. Provincial Prevent	1a. Provincial Prevent	1a. Provincial Prevent	1a. Provincial Prevent	1a. Provincial Prevent	1a. Provincial Prevent	1a. Provincial Prevent
<i>Alhagi maurorum</i>	Camel thorn	1a. Provincial Prevent	1a. Provincial Prevent	1a. Provincial Prevent	1a. Provincial Prevent	1a. Provincial Prevent	1a. Provincial Prevent	1a. Provincial Prevent
<i>Salvia sclarea</i>	Clary sage	1a. Provincial Prevent	1a. Provincial Prevent	1a. Provincial Prevent	1a. Provincial Prevent	1a. Provincial Prevent	1a. Provincial Prevent	1a. Provincial Prevent
<i>Crupina vulgaris</i>	Common crupina	1a. Provincial Prevent	1a. Provincial Prevent	1a. Provincial Prevent	1a. Provincial Prevent	1a. Provincial Prevent	1a. Provincial Prevent	1a. Provincial Prevent
<i>Isatis tinctoria</i>	Dyer's woad	1a. Provincial Prevent	1a. Provincial Prevent	1a. Provincial Prevent	1a. Provincial Prevent	1a. Provincial Prevent	1a. Provincial Prevent	1a. Provincial Prevent
