* These species may be present in the CKISS region but are managed by the Province (ie. Provincial EDRR). Sightings should follow the Provincial EDRR protocol as found in the CKISS Operational Framework.

** These aquatic plants are not ranked by Invasive Plant Management Area (IPMA) as aquatic plants are found in a different ecosystem and spread differently than terrestrial plants (ie. through waterbodies). As a result aquatic plants are only prioritized at the regional level in this list. For more specific information about aquatic plant distribution, see the Columbia Basin Aquatic Invasive Species Priority List <https://ckiss.ca/species/aquatic/>
